

Introduction to physical hydrogeology

Intended audience

Geologists, environmental scientists and others needing to gain an understanding of the key principles of physical hydrogeology. The course assumes little or no previous experience of groundwater and consists of the first two days of the 'Introduction to Hydrogeology' training course.

Course objectives

- To provide an overview of physical hydrogeology, introducing its principles, methods, scope and limits.
- To develop an understanding of how physical hydrogeology relates to associated disciplines, e.g. geology.

Course description

This course provides an introduction to the theory and practice of physical hydrogeology. The course is aimed principally at those involved in the geosciences and related disciplines with little or no previous experience of groundwater. The following main topics are covered:

- Occurrence and flow of groundwater.
- Physical groundwater evaluation techniques.

Course duration

2 days

Delivery mode

Classroom-based course

Course fee

£750

Date(s)

As required

Location

This course is available at our Wallingford, Nottingham (Keyworth) and Edinburgh training centres, and can be made available at customer premises by arrangement
