## Glossop Workshop 1; London Basin; 19 Nov. 2008 Newsletter 2; 5<sup>th</sup> February 2009

1. The BGS has kindly agreed to host the web site for the Forum. MHdeF will be meeting Kate Royse on 13<sup>th</sup> Feb to consider how this site should be designed and what it should contain.
2. If you have ideas and suggestions please let us know. I suggest you give the subject of your e-mail as **London Basin website** then we will pick up your contributions from the sea of correspondence that bedevils us all.
3. The next meeting of the Forum will be on Wednesday 25<sup>th</sup> March – put it in your diary. Venue to be confirmed but it will probably be in London. Anyone got space to offer?
4. At that meeting the following topics are likely to be on the Agenda.
  - a) The web site so far.
  - b) The “grand plan” for getting all this together as a Phil Trans Roy Soc publication; how does it sound?
  - c) The hydrogeology of the Chalk in the Basin – a subject rather overlooked in the first workshop, but another part of the “compartment” story.
  - d) The Basin as a prototype for these sorts of structural locations.
  - e) Whose up for a NERC/EPSRC bid to help get some of this together?
  - f) Membership – there’s no fee, anyone can join but the Forum would obviously benefit from having those organisations with data that they are prepared to make available, on board. Know anyone who should be “in” but isn’t?
  - g) AOB

With best wishes    MHdeF
