Shale gas: fracking, groundwater and earthquakes

Prof. Mike Stephenson, Head of Science (Energy), British Geological Survey

Shale gas is seen by some as a low-carbon bridge to renewables, and by others as a menace. This talk will examine the resource size and impacts of extraction.

- Date: Monday 14th January 2013 at 7.30pm

-Venue: Biology Lecture Theatre, Lancaster Environment Centre (LEC), Lancaster University, LA1 4YQ

-Reservations: Free. Please contact LEC HR team on 01524 -510082, or email lec.office@lancaster.ac.uk, with "RGS-LEC talk – 14th Jan" in the subject line.Places available on the day subject to availability.
