Note: these areas represent mineral planning permissions which have been granted in Mineral Workings (as at 01.01.00). Mineral resources defined on the map delineate areas within which potentially workable minerals may occur. These areas are not of uniform potential and also take no account of the quality of the material involved.

The mineral resource data presented are based on the best available information, but are not comprehensive and their quality is variable. The inferred boundaries shown are, therefore, approximate. Mineral planning permissions which have been granted in Mineral Workings (as at 01.01.00). Mineral resources defined on the map delineate areas within which potentially workable minerals may occur.
