The purpose of the maps in this series is to show the broad distribution of those mineral resources which may be of current or potential economic importance. The maps are intended to provide the basis for the formulation and implementation of policies and plans at Regional and Local Planning levels. Location may limit their working. The economic potential of specific sites can only be proved by a detailed evaluation programme. Such a programme needs to be designed in consultation with the Minerals Industry Board. This map is one of a series of maps produced by the British Geological Survey (BGS) as part of the Mineral Resource Information in Support of National, Regional and Local Planning (‘Minerals for Planning’) initiative. This initiative aims to provide a framework for the formulation and implementation of policies and plans at Regional and Local Planning levels. The maps are intended to provide the basis for the formulation and implementation of policies and plans at Regional and Local Planning levels. Location may limit their working. The economic potential of specific sites can only be proved by a detailed evaluation programme. Such a programme needs to be designed in consultation with the Minerals Industry Board.
