

Extractive Industry Geology 2020 conference

The Extractive Industry Geology (EIG) conference is one of the longest running and most keenly anticipated events in the UK minerals industry calendar. Organised by a passionate volunteer group of professionals representing all aspects of the industry, this is one conference that anyone connected to UK minerals should not miss!

The EIG Conference is the principal event for sharing knowledge, scientific research and good practice in the field of applied geology within the UK minerals industry. This event is for geo-professionals associated with the extraction of minerals, including those involved in geology, hydrogeology, geotechnical engineering, restoration and after-use, reserves and resources and quarry design and planning.

The 2020 conference includes 2–days of presentations on Thursday 9th and Friday 10th July at the Peter Chalk Centre, University of Exeter and will feature the key note Ansel Dunham lecture. The conference is preceded and followed by field excursions to local and regional extractive industry sites on Wednesday 8th and Saturday 11th July.
